20-60X85 (ANGLED)

VIPER

A high-end spotter without the high-end price tag, the Viper HD spotting scope proves you no longer need to drop 4-figures to get premium-level performance and features.

SPECIFICATIONS:-

Magnification	: 20-60x
Objective Lens Diameter	: 85 mm
Linear Field of View	: 101-50 ft/1000 yds
Angular Field of View	: 1.9-1 degrees
Eye Relief	: 17.8-19.6 mm
Length	: 17.5 inches
Weight	: 76.6 oz
Close Focus	: 36 feet

20-60X85 (ANGLED)

SPOTTING SCOPE

The redesigned Diamondback HD spotting scopes have all the horsepower the long-distance hunter needs, and they excel in lowlight—right when you need it most. We've also streamlined the exterior for a sleeker, snag-free profile, building in a helical focus wheel.

SPECIFICATIONS:-

Magnification	: 20-60x
Objective Lens Diameter	: 85 mm
Linear Field of View	: 108-60 ft/1000 yds
Angular Field of View	: 2.1-1.1 degrees
Eye Relief	: 20.3-18.3 mm
Length	: 16 inches
Weight	: 60.9 oz
Exit Pupil	: 4.25-1.41 mm
Close Focus	: 24.6 feet

DIAMONDBACK® HD

8X42/10X50/10X42

The Diamondback® HD smashes the scale of price vs performance, delivering a rock-solid optic that optically punches high above its class. The included GlassPak™ binocular harness keeps your glass close at hand, ready to deploy at a moment's notice, all while providing protection and significantly more comfort than traditional neck straps.

FEATURE:-

1. **ArmorTek®**:- Ultra-hard, scratch-resistant coating protects exterior lenses from scratches, oil, and dirt.
2. **Multi-Coated**:- Fully Multi-Coated
3. **HD Lens Elements**:- HD
4. **Phase Correction**:- Coating on roof prism models enhances resolution and contrast.
5. **Rubber Armor**:- Provides a secure, non-slip grip, and durable external protection.
6. **Shockproof**:- Rugged construction withstands recoil and impact.

INCLUDING HARNESS

VIPER® HD

8X42/10X50/12X50

Viper HD binoculars are an optical masterpiece, giving hunters, shooters and outdoor enthusiasts a premium option without the premium price tag. The HD optical system delivers stunning resolution, color fidelity and edge-to-edge clarity. These are one of the lightest, most compact, full-size binos on the market—a noteworthy attribute when gear consideration can be measured in grams. Includes GlassPak chest harness, keeping your binos at the ready while providing comfortable, protected, strain-free, all-day carry.

FEATURE:-

- **ArmorTek®:-** Ultra-hard, scratch-resistant coating protects exterior lenses from scratches, oil and dirt.
- **Multi-Coated:-** XR™ Fully Multi-Coated
- **HD Lens Elements:-** HD
- **Phase Correction:-** Coating on roof prism models enhances resolution and contrast.

BRUNTON

GEO LITE TRANSIT

A baseplate compass that works like a transit!

FEATURES:-

- Transit-style direct read azimuth system.
- Slender needle for a more accurate read.
- Hinge clinometer enables dip/dip azimuth measurements.
- Integrated protractor for plotting data on a field map.
- Bubble level for accurate strike measurement.
- 2° resolution for azimuthal readings (strike, dip azimuth, directional bearings).
- 5° resolution for clinometer readings.
- Brunton EverNorth Magnet resists demagnetization over time.
- Map Magnifier.

F-5020 Standard Pocket Transit

The lightest professional transit on the market! The ComPro's lid and base are constructed out of a lightweight composite material with the same internal components as the Standard Brunton Transit, making it 1.2 ounces lighter.

PRODUCT HIGHLIGHTS

- Made in the USA in Riverton, Wyoming
- The newly designed body is CNC-milled and hard-anodized for simplicity and durability.
- The flat bottom with a non-slip silicon foot allows for low-angle strike and dip measurements.
- An unobtrusive bottle opener that stays out of the way until needed.
- The mirror enables sighting and measurement of bearings and vertical angles.
- Short and long sights give the user additional functionality and accuracy when shooting bearings.
- Induction dampening makes for a quick-settling needle.

F-5010 Geopocket Transit

The lightest professional transit on the market! The ComPro's lid and base are constructed out of a lightweight composite material with the same internal components as the Standard Brunton Transit, making it 1.2 ounces lighter.

PRODUCT HIGHLIGHTS

- Made in the USA in Riverton, Wyoming
- The newly designed body is CNC-milled and hard-anodized for simplicity and durability.
- The flat bottom with a non-slip silicon foot allows for low-angle strike and dip measurements.
- An unobtrusive bottle opener that stays out of the way until needed.
- The mirror enables sighting and measurement of bearings and vertical angles.
- Short and long sights give the user additional functionality and accuracy when shooting bearings.
- Induction dampening makes for a quick-settling needle.

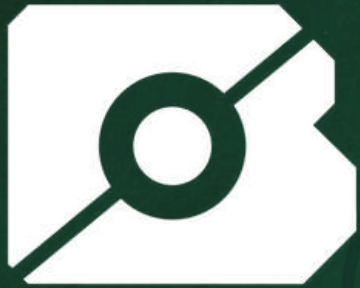

F-5008 ComPro Composite Transit

The lightest professional transit on the market! The ComPro's lid and base are constructed out of a lightweight composite material with the same internal components as the Standard Brunton Transit, making it 1.2 ounces lighter.

PRODUCT HIGHLIGHTS

- Traditional transit measurement method.
- The composite body on the ComPro is ultralight and tough.
- The mirror enables sighting and measurement of bearings and vertical angles.
- Short and long sights give the user additional functionality and accuracy when shooting bearings.
- The precision NdFeB disc magnet provides very accurate readings and resists demagnetization.
- Our magnetic needle can be balanced for use almost anywhere in the world.
- Induction dampening makes for a quick-settling needle.

BRUNTON

TRANSIT COMPASS

Ultralight & tough composite body

Lid rotates 360° around both axes

HIKMICRO

E20 Plus

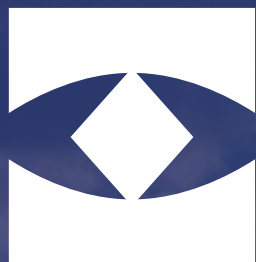

Thermal Camera For Camera

Simply plug in the E20 Plus to your smartphone (Only support Andriod Phones) and start exploring it with HIKMICRO Sight APP right away, wireless connectivity supported

Specification

- Power Supply : USB Type-C interface
- Power Consumption : 360 mW
- Working Temperature: From -10 °C to 50 °C
- Dimension : 26.6mm*26.6mm*27.2mm
- Weight : 26g
- Protection Level : IP40

HIKMICRO

THERMAL MONOCULAR

Equipped with a powerful 25 millimeter lens and an advanced 384 sensor with 12 micrometer pixel pitch, HIKMICRO LYNX LH25 2.0 captures highly detailed images at short and medium distances, especially with a high thermal sensitivity of NETD < 20 mK. With its exceptional capabilities, it effectively detects games at distances of up to 1200 meters.

Specification :-

• Image Sensor	VOx Uncooled Focal Plane
• Max. Resolution	Arrays
• Frame Rate	384 × 288
• Pixel Interval	50 Hz
• Response Waveband	12 μm
• NETD	8 μm to 14 μm
• Lens (Focal Length)	Less than 20 mK (@25°C), F# = 1.0
• Focus Mode	25 mm, f1.0
• Detection Range	Focus Ring
• Min. Focusing Distance	1200 m
• Magnification	2.5 m
• Field of View(H × V),	2.4x to 19.2x (8x)
Degrees / m @100m	10.5° × 7.9° / 18.4 m×13.8 m

Key Feature:-

- High sensitivity thermal module NETD < 20 mK (@25°C, F# = 1.0)
- 384 × 288 resolution with 12μm detector
- 1024 × 768 resolution 0.39-inch OLED display
- Replaceable and rechargeable Li-ion battery
- 275 g lightweight, with a compact and ergonomic design
- Up to 6.5 hours of continuous operation

SUUNTO

MC-2 Mirror Compass

When venturing out into new territory, MC-2 sighting compasses offer precision navigation with a variety of carefully engineered and dependable features for challenging conditions. Depending on the variant, MC-2 comes with Metric UTM scales and inch ruler or USGS UTM scales.

PRODUCT HIGHLIGHTS

- High-grade steel needle with jewel-bearing
- Balanced for the southern hemisphere
- Adjustable declination correction
- Liquid-filled capsule for stable operation
- Mirror for sighting bearings and signaling
- Sighting hole and notch for accurate bearings
- Clinometer
- Luminescent markings for working in low light
- Metric UTM scales and inch ruler
- Baseplate with magnifying lens
- Detachable snap-lock lanyard with wristlock

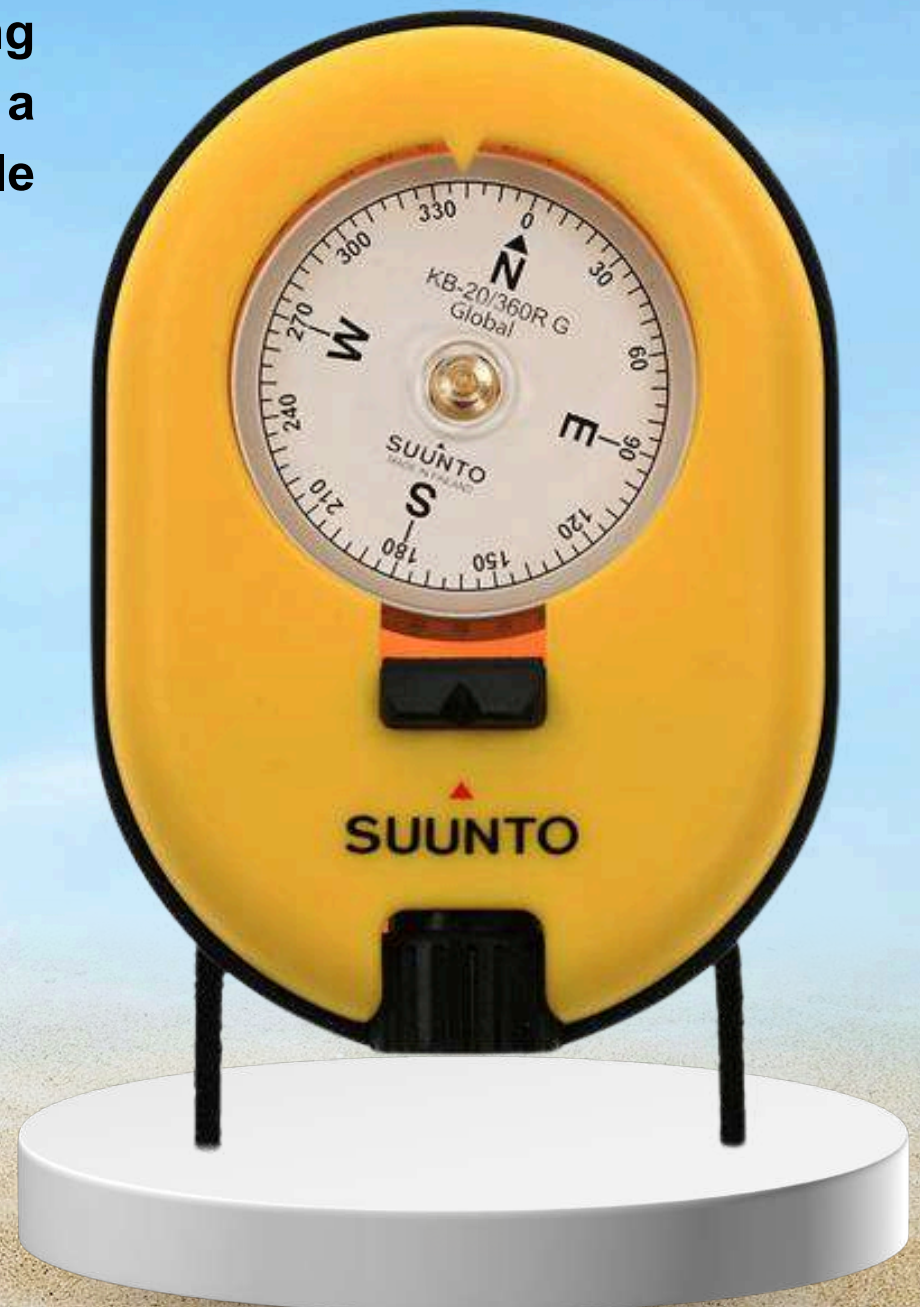

SUUNTO

KB-20/360R G YELLOW COMPASS

The advanced navigation compass. When venturing out into new territory, these sighting compasses offer precision navigation with a variety of carefully engineered and dependable features for challenging conditions.

PRODUCT HIGHLIGHTS

- Sighting tools for accurate direction-taking
- Rugged construction
- Accuracy 0.5°
- Graduation interval 1°
- Scale: Azimuth 360°, Reversed 360°
- Adjustable diopter
- Sapphire bearing
- Liquid-filled capsule for stable operation
- Plastic housing
- Floating
- Lanyard
- 2-year warrant

Hydromoth

HYDROMOTH WITH UNDERWATER CASE

HydroMoth is a variant of the standard AudioMoth specifically designed to be deployed in the underwater case. The HydroMoth hardware is directly compatible with all AudioMoth firmware and uses the same audio front-end and microphone

FEATURES:-

- Re-positioned LEDs for improved visibility in the underwater case
- Improved 32.768 kHz MEMS oscillator to reduce clock drift.
- EFM32 Gecko processor
- Powered by 3 x AA batteries
- Analog pre-amplifier with adjustable gain.
- Tested to a depth of 30m for 2 months, no leakage
- Fully submersible with the underwater case

AudioMoth

THE AUDIOMOTH IPX7 WATERPROOF CASE

AudioMoth is a low-cost, full-spectrum acoustic logger, based on the Gecko processor range from Silicon Labs. Just like its namesake the moth. IPX7 waterproof case is made from injection-molded polycarbonate and comes with an adjustable velcro strap, which makes securing AudioMoth simple and easy.

FEATURES:-

- EFM32 Gecko processor
- Capable of recording at sample rates up to 384kHz
- Analog MEMS microphone
- Injection-molded polycarbonate protective case
- Sealed using an easy-to-use clasp and compression o-ring
- Rain hood designed to prevent water pooling
- Microphone opening protected by a Porelle acoustic vent

MINOX

Night Vision Monocular

DIGITAL NIGHT VISION DEVICE

MINOX is presenting with the **NVD 650** a new digital night vision device with a recording function that ensures high light-gathering capabilities that result in good resolution and image brightness.

Features:

- 6x magnification (optical), 5x digital (= max. 30x magnification)
- Powerful IR emitter (850 nm wavelength): range up to 350 m
- Can be used during the day
- Rail for additional IR lighting
- Recording feature at night

Fully digital. Fully affordable.
